

# Largest Cubic Inch Box on the Market

## Maximum depth - 3 7/8" deep

(From the face of the box to the bottom)

- Accepts larger wiring devices; i.e. dimming switches, fan switches, GFCI, motion sensors
- Allows for additional wire capacity

- Can be used with wood or steel stud
- Changes in electrical codes require larger cubic inch boxes

Dividers are available to partition two and three gang boxes for low voltage/communication applications

Contractor preferred clamps lock wiring in place
