To Whom It May Concern:

CANTEX Rigid nonmetallic PVC conduit may contain up to 20% (twenty percent) by weight of recycled Rigid PVC plastic. This 20% is composed entirely of Pre-Consumer content. The remaining 80% is virgin PVC compound. As such, CANTEX Schedule 40 and Schedule 80 rigid nonmetallic PVC products meet MR 4.1 / 4.2 Recycled Content requirements of LEED.

CANTEX products do **not** contain any perfluorinated compounds, nor have any halogenated flame retardants.

CANTEX #99 Low VOC PVC Glue (Clear or Gray), CANTEX All Weather Low VOC cement, and CANTEX #50 Low VOC ENT primer meet the requirements of LEED IEQ 4.1 (Low-Emitting Materials Adhesives & Sealants) with a VOC of 510 g/L or less. CANTEX C-10 Low VOC cleaner also meets LEED IEQ 4.1 requirements, but with a significantly smaller VOC content (25 g/L or less).

CANTEX PVC Fittings may contain up to 10% (ten percent) by weight of recycled PVC Plastic. This 10% is composed entirely of Pre-Consumer content. The remaining 90% is virgin PVC compound. As such, CANTEX PVC Fittings meet MR 4.1 Recycled Content requirements of LEED.

Sincerely,

David Gwinn
