Subject: Conduit Price Increase – April 29, 2026

I wanted to bring to your attention some significant developments regarding PVC resin pricing currently impacting the industry. In the first quarter of 2026, manufacturers raised prices by \$.06 per pound. This was followed by a sharp increase of \$.05 per pound in April, with an additional \$.04 per pound announced for May. Altogether, these changes amount to a remarkable 37% jump in resin costs.

Beyond resin pricing, we are also seeing continued increases in the cost of other additives. Additionally, freight expenses are rising rapidly driven by elevated fuel prices. All of these factors have created a particularly challenging environment for everyone involved.

Given these circumstances, CANTEX will implement two PVC conduit price increases effective April 29, 2026, and May 18, 2026. Please find the details of the revised pricing structure attached. The May 18 price sheets will be sent out soon. All orders at current prices must be placed by the close of business on Tuesday, April 28, 2026.

If you have any questions or would like to discuss these changes further, feel free to reach out. Thank you for your understanding as we navigate these industry-wide changes together.

Regards,

Dave Milius
