

## CAO Expansion Coupling for Use with Type D Duct

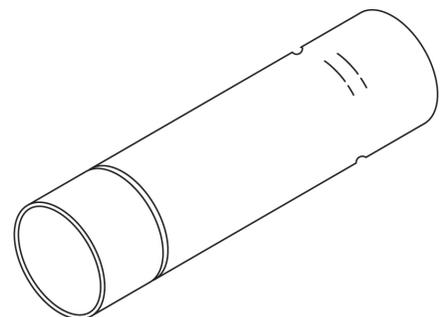

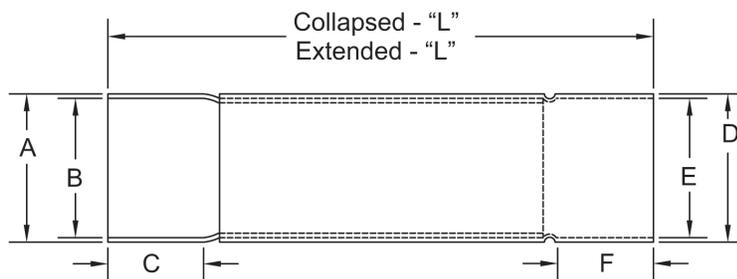

CANTEX 6161634 is a 4 in. CAO Type C Expansion Coupling designed to compensate for length changes due to temperature variations in exposed conduit runs.

- Two-piece construction with a 8 inch maximum expansion
- Internal O-ring prevents leakage
- Durable non-conductive PVC will not rust or corrode
- For use with CAO Type C conduit
- Made in USA
